

Born in the rugged west coast rainforests of British Columbia, Canada, STORMTECH's designs are inspired through the lessons learned from the rain, snow, and sun.

All STORMTECH products come with an unbeatable 5 year warranty.

JAMES HARVEST

Americana Inspired, European Designed. The JAMES HARVEST collection is based on American collegiate retail fashion and is characterised by its impeccable quality.

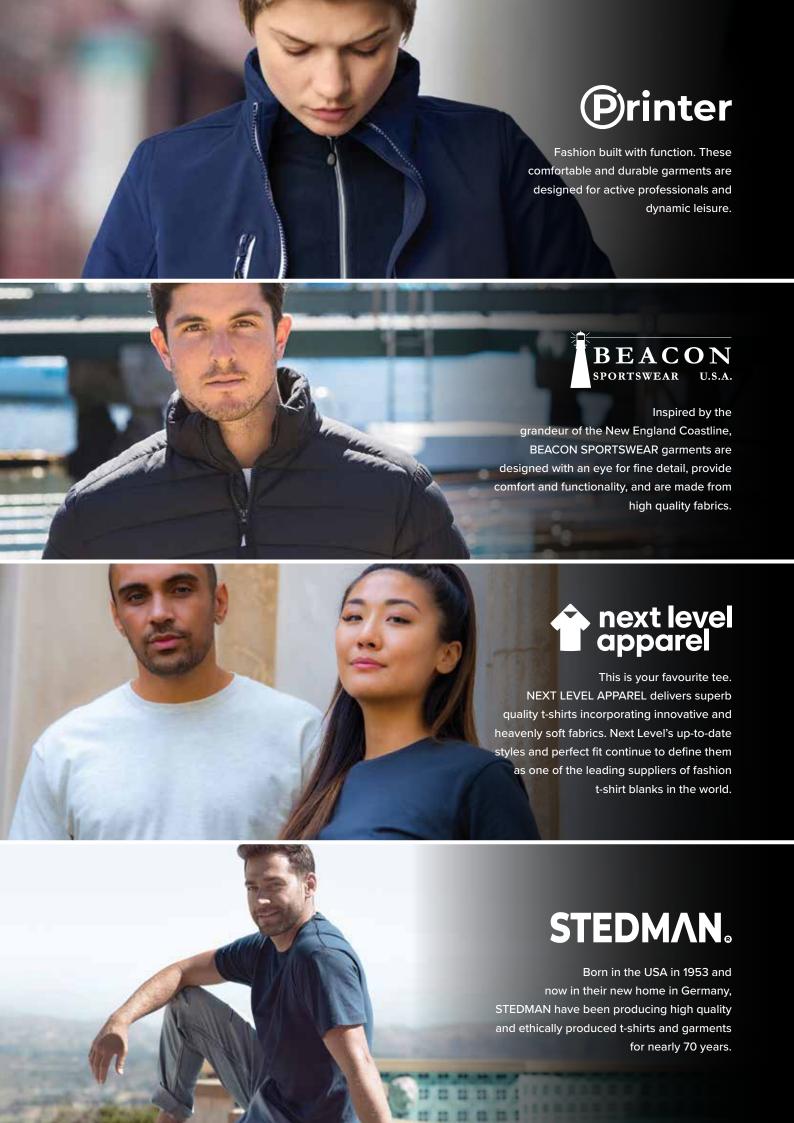

Making the finer things work. The highest quality business shirts designed with detailed aesthetics and precision craftsmanship.

GREAT SOUTHERN CLOTHING offers cleanly designed, functional corporate garments with premium fabrics and carefully crafted fits.

Product Classifications

TECHNICAL

Engineered, high-performance fabrics with a range of technical features including moisture-management, mechanical stretch and built-in sun protection. Usually have design features such as taped seams and snag-resistance. The fabrics are very functional and durable.

COTTON

Cotton is a natural fabric and will perform well in most conditions. It has good breathability and decent durability. Cotton has a relatively high tensile strength, is very water absorbent, but it also dries quickly. Usually a piqué knit, the fabric drapes well on the body.

COTTON BLEND

Cotton is blended with other fibres to produce a stronger and more attractive material. Rayon, Lycra®, polyester, linen and Elastane are some fibres that are blended with cotton to increase Styling, durability and stain/wrinkle/heat resistance.

Symbols/Icons used in this Section

Active Moisture Management

Next-to-skin climate control with moisture management technology to regulate your core. Body moisture is transported from the skin to the fabrics outer surface through the capillary action of specialised moisture wicking yarns.

Anti-snag Finish

Anti-snag construction is achieved by using specialised yarns that are less likely to break or unravel when pulled or snagged by incorporating specific knitting techniques that reinforce the fabric and reduce the risk of snagging. The result is a more durable and resilient fabric, improving the quality and longevity of the finshed product.

Increased Use of Sustainable Materials

Sourcing recycled and sustainable materials for products is a top priority in our daily business operations and product development. This dedication to sustainable practices is reflected in every new product we develop. Our focus on recycled content ensures that our garments not only meet high-quality standards but also contribute to a more environmentally conscious industry.

Sun Protection

UVX rating is a measurement of the ultraviolet protection provided by a fabric used in garments, indicating how effectively the fabric blocks UVA and UVB radiation from the sun. Fabrics are treated or constructed using densely woven or knitted fabrics and UV absorbent fibres to reflect UVA and UVB light.

Odor Control

Polygiene Freshness-treated garments allow you to enjoy the confidence of fresh, all-day wear while minimising the need for frequent washing. By extending the time between washes, these garments save you valuable time, reduce water consumption and minimise waste.

Decoration

We understand that your brand is your business, so we work to ensure that most of our products provide prominent locations for brand decoration.

Make the choice between the luxurious feeling of Neptune's 100% fine combed cotton or the flexibility of the Sunset's 95% high quality cotton combined with 5% of the comfortable stretch material Lycra* that allows for extra movement.

THE FIT

The polo shirts comes in three stylish cuts. The classic Regular, the fitted Modern and the sophisticated Woman.

REGULAR

The traditional, relaxed fit. Somewhat longer sleeves and straight body.

The original fit.

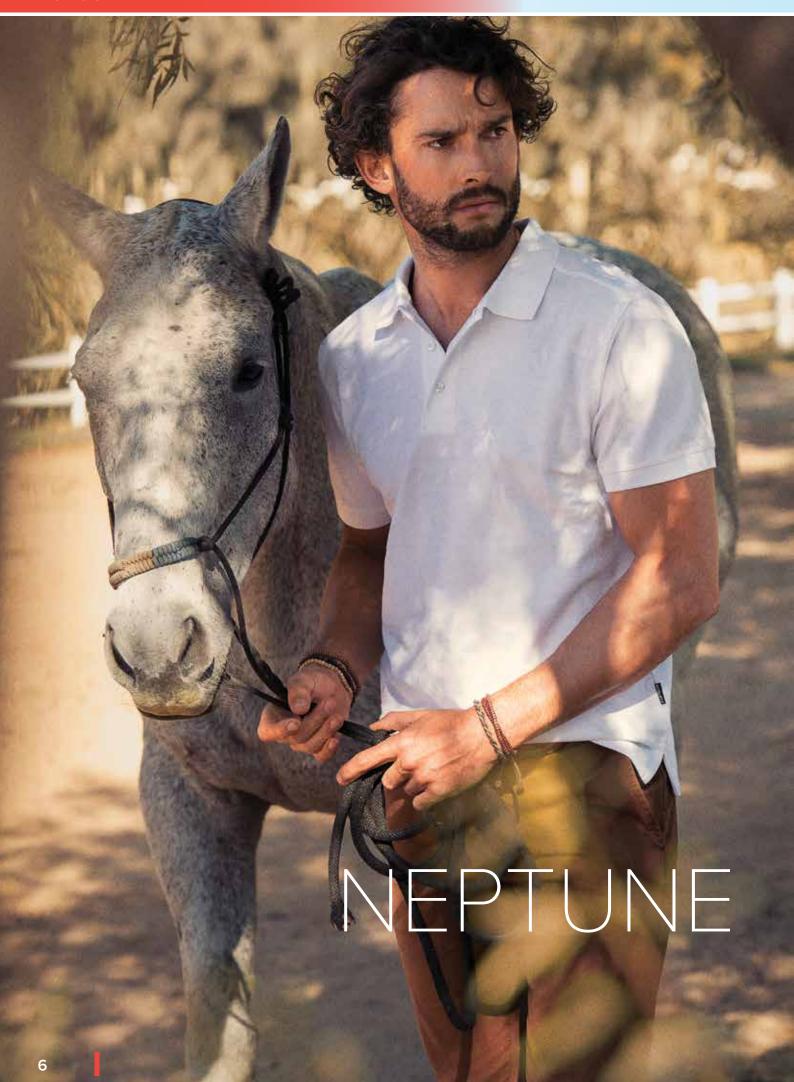

MODERN

The more fitted cut, with a little shorter sleeves that follows the biceps.

WOMAN

Our fashionable female cut, with a slightly fitted shape and shortened sleeves.

Product Classifications

TECHNICAL OUTERWEAR

The best in technical outerwear. Design excellence and functionality that blends exclusive technologies that provide maximum protection and

THREE-IN-ONE SYSTEM

Pairing a weatherproof outer shell with a removable, ultra-warm insulated inner jacket. Adjustable. Interchangeable

LIGHTWEIGHT THERMAL SHELLS

Lighter weight outerwear providing great design with functionality to keep you warm and dry.

THERMAL OUTERWEAR

Waterproof and breathable. Outerwear that provides great design with functionality to keep you warm and dry.

RAINWEAR

Provides wet weather protection in a technical and aesthetic fashion.

TECHNICAL SOFTSHELLS

Built with attention to detail to ensure warmth and comfort. Face fabric provides a solid barrier against the elements, while the interior is warm

LIGHTWEIGHT SHELLS

Breathability, durability, warmth and comfort have come together to create the pinnacle of lightweight weather solutions.

FLEECE & LAYERING

An array of base and mid layers that are lightweight, functional and perfect for active use. Durable and moisture-resistant.

PERFORMANCE HOODIES

Stylish, technical and comfortable performance fabrics that can be layered in colder conditions.

URBAN CASUAL

A range of products that makes looking good so natural.

Symbols/Icons used in this Section

Active Moisture Management

Next-to-skin climate control with moisture management technology to regulate your

core. Body moisture is transported from the skin to the fabrics outer surface through the capillary action of specialised moisture wicking yarns.

Climate Control

Ultimate weather protection through advanced waterproof/breathable technology, engineered to keep moisture at bay, inside

and out. H2XTREME® membranes stop water and wind frmo penetrating the garment while allowing water vapor to escape, keeping you warm and dry in all weather conditions.

PFC-Free DWR Water Resistance

PFC-free Durable Water Repellent technology is a polymer coating added to outerwear to provide water-resistant protection. DWR treated fabrics prevent light rain and snow precipitation from saturating the outer fabric surface and prevents fabric from becoming weighed down by excess moisture for optimized comfort and freedom of movement.

All Weather Thermal Protection

High loft, high efficiency Thermolex synthetic down - developed and tested by STORMTECH is inserted into each quilted panel to a specific fill weight in order to achieve maximum warmth and softness. Engineered to be lightweight and highly efficient in all weather conditions.

THERMALSHELL Thermal Shell Technology

High efficiency/high loft synthetic alternative to down, designed to maintain its thermal properties while being lightweight providing superior resistance in colder conditions. Quilting is achieved by sewing through all 3 layers of the garment.

Anti-snag Finish

Anti-snag construction is achieved by using specialised yarns that are less likely to break or unravel when pulled or snagged by incorporating specific knitting techniques that reinforce the fabric and reduce the risk of snagging. The result is a more durable and resilient fabric, improving the quality and longevity of the finshed product.

Sun Protection

UVX rating is a measurement of the ultraviolet SUN PROTECTION protection provided by a fabric used in garments, indicating how effectively the fabric blocks UVA and UVB radiation from the sun. Fabrics are treated or constructed using densely woven or knitted fabrics and UV absorbent fibres to reflect UVA and UVB light.

Increased Use of Sustainable Materials

Sourcing recycled and sustainable materials for products is a top priority in our daily business operations and product development. This dedication to sustainable practices is reflected in every new product we develop. Our focus on recycled content ensures that our garments not only meet high-quality standards but also contribute to a more environmentally conscious industry.

Polygiene Odor Control

Polygiene Freshness-treated garments allow you to enjoy the confidence of fresh, all-day wear while minimising the need for frequent washing. By extending the time between washes, these garments save you valuable time, reduce water consumption and

Heavy-duty, heavy weight nylon and polyester fabrics are constructed to withstand the most rigorous and extreme industrial applications and weather conditions. HD fabrics are also coated to achieve a high level of water resistance.

HD Outshell

Waterproof

Keeps outside moisture from penetrating the fabric. The waterproof rating is typically expressed in millilitres (1,000mm to 10,000mm) based on water pressure tolerance over a 24 hour period. Generally, the higher the rating, the higher the waterproof protection

BASIC | Level 1 600 to 2,000mm

HIGH | Level 2 2,000 to 8,000mm

EXTREME | Level 3 8,000 to 20,000mm+

The movement of air from one side of the fabric to the other to keep the wearer comfortable. The breathability rating is typically expressed in a gram measurement of how much vapour a square metre (G/M2) of fabric will allow to pass in a 24-hour

BASIC | Level 1

1.000a/m²

more breathable the garment.

HIGH | Level 2 5,000g/m² to 10,000g/m²

period (typically 1,00 G/M² to 10,000 G/M²). The higher the number, the

EXTREME | Level 3 15,000g/m²+

Climate Range

A system developed by STORMTECH by taking several factors into consideration such as activity level, wind chill, sun exposure, etc. A useful guide for selecting the appropriate garment for your adventure.

Three-in-One Interchangeable System Jackets

The original, since 1983. When heading outdoors you can predict and plan a full day of outdoor activity with certainty, but what you can't predict is what the weather will hold. Enter our 3-in-1 system jackets; your versatile answer to the unpredictable. These system jackets are 3 jackets in 1, pairing a weatherproof outer shell with a removable, ultrawarm insulated inner jacket. This allows you to customise your jacket when the weather is playing fickle fiddle. STORMTECH 3-in-1 system jackets have been developed for a wide range of outdoor environments, for both work and play.

STORMTECH®

Fairbanks 5-in-1 System Jacket

Intemperate weather just met its match. The Fairbanks 5-in-1 System Jacket can be worn in 5 different configurations that adjust to changing weather conditions. This winter parka converts to a rainshell by removing the thermal liner, which can also be worn as a thermal shell or vest. The snap-off adjustable hood allows added inclement weather protection. It's a lightweight design with heavyweight resistance in moderate to extreme conditions. Smart design dual hand pockets offer plentiful space for your valuables.

FEATURES

- STORMTECH H2XTREME \$ 8000/8000 Waterproof / Breathable outer shell
- Stormtech HD nylon out shell
- PFC-Free Durable Water Repellent finish

Product Classifications

TECHNICAL

Engineered, high-performance fabrics with a range of technical features including moisture-management, mechanical stretch and built-in sun protection. Usually have design features such as taped seams and

snag-resistance. The fabrics are very functional and durable.

COTTON

Cotton is a natural fabric and will perform well in most conditions. It has good breathability and decent durability. Cotton has a relatively high tensile strength, is very water absorbent, but it also dries quickly.

Usually a piqué knit, the fabric drapes well on the body.

COTTON BLEND Cotton is blended with other fibres to produce a stronger and more attractive material. Rayon, Lycra®, polyester, linen and Elastane are some fibres that are blended with cotton to increase

styling, durability and stain/wrinkle/heat resistance.

Increased Use of Sustainable Materials

Sourcing recycled and sustainable materials for products is a top priority in our daily business operations and product development. This dedication to sustainable practices is reflected in every new product we develop. Our focus on recycled content ensures that our garments not only meet high-quality standards but also contribute to a more environmentally conscious industry.

Odor Control

Polygiene Freshness-treated garments allow you to enjoy the confidence of fresh, all-day wear while minimising the need for frequent washing. By extending the time between washes, these garments save you valuable time, reduce water consumption and minimise waste.

Feather Free Thermal Shell

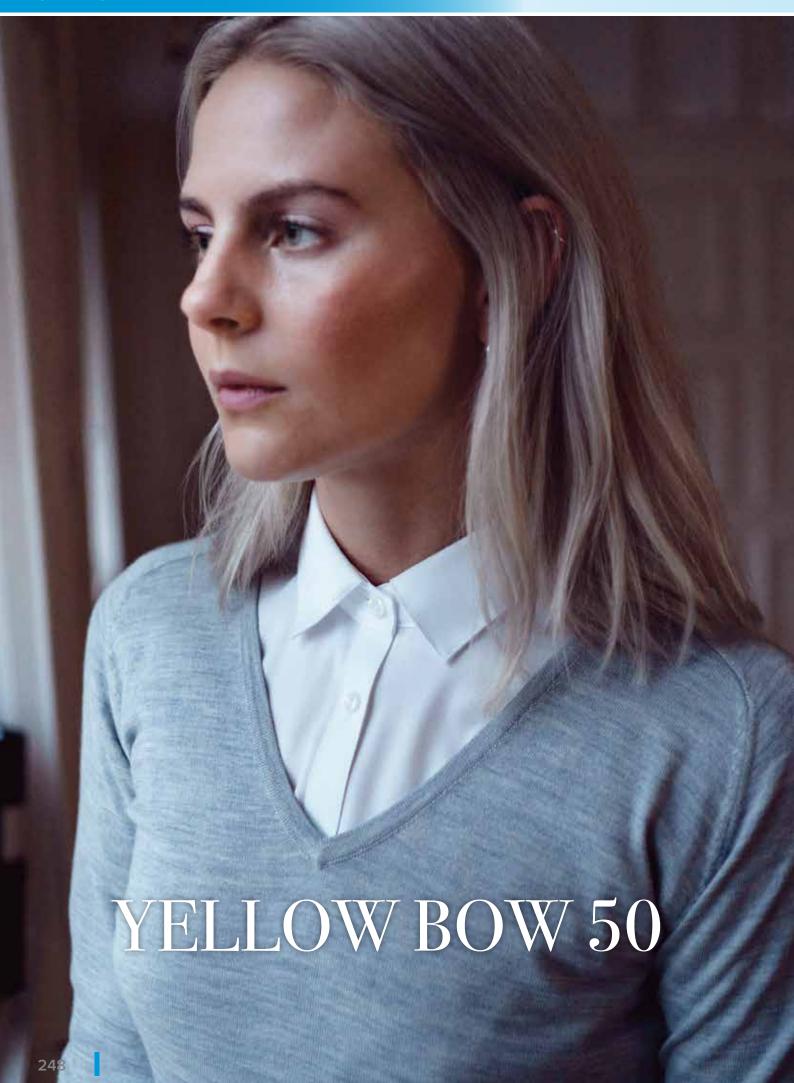

Lightweight elemental defense. Highly efficient and highly compressible synthetic down alternative maximum warmth in extreme cold. All STORMTECH products are feather-free and fur-free. Their Animal Derived Materials policy further outlines the restrictions on use of materials sourced from endangered animal habitats. The guiding principles are the give freedoms of animal welfare as underline by the World Organization for Animal Health.

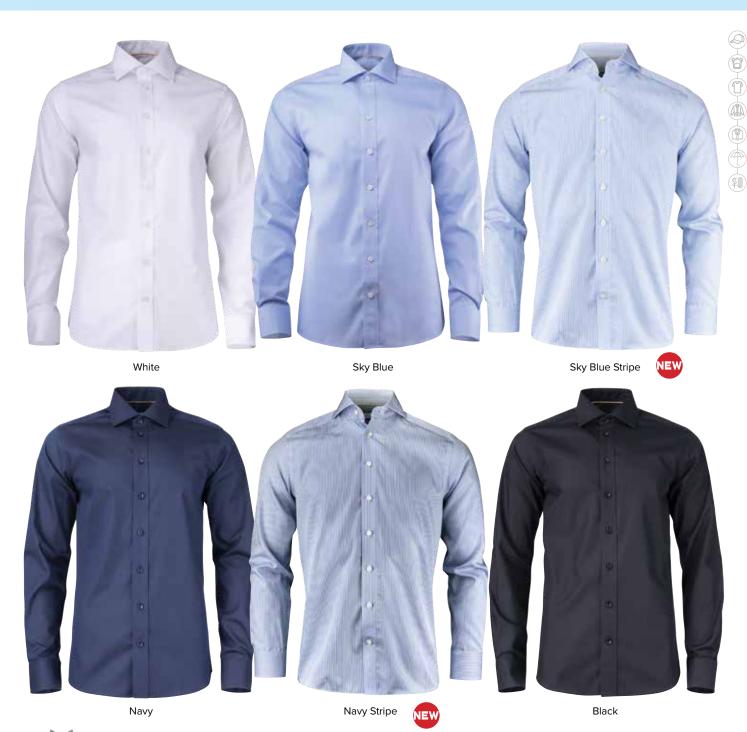

Decoration

We understand that your brand is your business, so we work to ensure that most of our products provide prominent locations for brand decoration.

HFY53 | HFY53W

Yellow Bow 53

This shirt is taking the Yellow Bow-line to the next level with its high performance and eco-conscious choice of raw materials. A modern check-pattern and a fine twill weave combined with soft collar and cuffs gives the shirt a smart look. When you get the shirt in hand you will immediately recognise there's more to it than catches the eye. The feather-light weight at first, silky soft hand-touch makes this shirt a master of performance. It is also easy-care treated, so you can simply wash and wear as you like.

HF320 | HF320W

Red Bow 20

Through the Red bow line we reinvent the classic shirt. By adding sophisticated colours and details we made it more modern and smart, but still kept it a classy business shirt. The shirt is crafted in our favourite high performance twill texture along with a contrasting check at collar and cuffs. This gives the perfect sheen and results in a substantial quality feel. It makes it less transparent than similar dress shirts.

- Taped main-seams (No wrinkles)
- Tall, 4mm-thick buttons in contrasting colours for a substantial, modern look
- · Curved hem

COTTON

Purple Bow 49

A double 100's jacquard fabric, woven with white dots on navy background for a modern and sophisticated look. Combine it with the full suit or together with jeans, either way it will serve you well. Our newly developed fabric is made with a mechanical stretch for better comfort. The mechanical stretch is a new innovative way of giving comfort to a 100% natural long stapled, compact cotton fabric. It gives elasticity to the shirt of up to 12% stretch the weft way, and still keeps our great non-rron performance. This is innovative shirtmaking at its best.

FEATURES

- · Innovative mechanical stretch
- Classic, pearl white 2.5mm thick buttons
- Curved hem
- Modern cut-away collar with soft underlining and hidden button down
- · Navy jacquard fabric, woven with white micro dots
- Split back yoke
- Soft round edge cuff with cufflink hole
- Flat front placket
- Taped main-seams (No wrinkles)

COTTON

HF301 | HF301W

Green Bow 01

Nothing beats the clean look of a solid dress shirt but even at a solid color there are features that make this shirt stand out from the crowd. The shirt is crafted in our favourite high performance twill texture. This gives the perfect sheen to it, results in a good hand feel and makes it less transparent than similar white dress shirts. A split yoke in back, medium cut-away collar and a 35mm raised placket set the edge for this sharp, but classic shirt.

FEATURES

- Taped main-seams (No wrinkles)

Product Classifications

TECHNICAL

Engineered, high-performance fabrics with a range of technical features including moisture-management, mechanical stretch and built-in sun protection. Usually have design features such as taped seams and snag-resistance. The fabrics are very functional and durable.

COTTON

Cotton is a natural fabric and will perform well in most conditions. It has good breathability and decent durability. Cotton has a relatively high tensile strength, is very water absorbent, but it also dries quickly. Usually a piqué knit, the fabric drapes well on the body.

COTTON BLEND

Cotton is blended with other fibres to produce a stronger and more attractive material. Rayon, Lycra®, polyester, linen and Elastane are some fibres that are blended with cotton to increase styling, durability and stain/wrinkle/heat resistance.

Symbols/Icons used in this Section

Active Moisture Management

Next-to-skin climate control with moisture management technology to regulate your core. Body moisture is transported from the skin to the fabrics outer surface through the capillary action of specialised moisture wicking yarns.

Anti-snag Finish

Anti-snag construction is achieved by using specialised yarns that are less likely to break or unravel when pulled or snagged by incorporating specific knitting techniques that reinforce the fabric and reduce the risk of snagging. The result is a more durable and resilient fabric, improving the quality and longevity of the finshed product.

Increased Use of Sustainable Materials

Sourcing recycled and sustainable materials for products is a top priority in our daily business operations and product development. This dedication to sustainable practices is reflected in every new product we develop. Our focus on recycled content ensures that our garments not only meet high-quality standards but also contribute to a more environmentally conscious industry.

Sun Protection

UVX rating is a measurement of the ultraviolet protection provided by a fabric used in garments, indicating how effectively the fabric blocks UVA and UVB radiation from the sun. Fabrics are treated or constructed using densely woven or knitted fabrics and UV absorbent fibres to reflect UVA and UVB light.

Odor Control

Polygiene Freshness-treated garments allow you to enjoy the confidence of fresh, all-day wear while minimising the need for frequent washing. By extending the time between washes, these garments save you valuable time, reduce water consumption and minimise waste.

Contains Organic Cotton

Migrating to Organic Cotton

STEDMAN.

An organization whose aim is promoting safe, lawful, humane and ethical manufacturing around the world. A WRAP certification means that the facility is currently meeting (or exceeding) international social compliance standards. This provides a level of assurance to potential buyers that is widely recognized and accepted.

Our textile articles and components have been tested for harmful substances, assuring high product safety.

Our OCS-certified organic cotton is produced according to strict guidelines. The cultivation of organic cotton preserves the health of the soil, nature and people. The use of toxic chemicals and genetically modified organisms (e.g. seeds) is prohibited.

Decoration

We understand that your brand is your business, so we work to ensure that most of our products provide prominent locations for brand decoration.
