Nautilus

Men's Quilted Vest

| Available in Womens KXV-1W

100% polyester pongee

H2XDRY is a moisture wicking technology that's used to keep water away from your skin and your garment dry.

Ultimate weather protection through advanced waterproof/breathable technology-perfected to keep moisture at bay, inside and out.

Anti-snap construction is achieved by using specialised yarns that are less likely to break or unravel when pulled or snagged by incorporating specific knitting techniques that reinforce the fabric and reduce the risk of snagging.

UVX rating is a measurement of the ultraviolet protection provided by a fabric used in garments, indicating how effectively the fabric blocks UVA and UVB radiation from the sun, which can cause skin damage. Fabrics are treated or constructed using densely woven or knitted fabrics and UV absorbent fibre to reflect UVA and UVB light.

FABRIC TECHNOLOGY

Heavy-duty, heavy weight nylon and polyester fabrics are constructed to withstand the most rigorous and extreme industrial applications and weather conditions. HD fabrics are also coated to achieve a high level of water resistance.

High loft, high efficiency Thermolex™ synthetic down – developed and tested by STORMTECH is inserted into each quilted panel to a specific fill weight in order to achieve maximum warmth and softness.

Polygiene Stay Fresh-treated garments allow you to enjoy the confidence of fresh, all-day wear while minimising the need for frequent washing.

The PFC-free DWR (Durable Water Repellent) technology is a polymer coating added to outerwear to provide water-resistant protection.

STORMTECH are proud to offer an unbeatable 5 Year Warranty across our entire range, giving you peace of mind when you buy.

J808

The Puffer Vest

| Available in
Women's J808W

100% nylon, horizontal quilted body
